

# 6 hook gauge METAL COAT RACK

Thank you for purchasing the **6 Hook Gauge Metal Coat Rack**. This page lists all the contents included in the box. Please take the time to identify the hardware as well as the individual components to this product. As you unpack and prepare for assembly, place the contents on a carpeted or padded area to protect them from damage.

## hardware

2 - screws

2 - plastic anchors

Missing hardware?

Please call **800.606.6387** for replacements.

## tools required

phillips head screwdriver

level

power drill  
(for pilot holes only)

## components

1 - coat rack assembly

## wall mounting assembly

For safe mounting, it is essential to use wall anchors appropriate to your wall type (i.e. plaster, drywall, concrete, etc.). Mount to wood studs whenever possible. These instructions are for drywall mounting only.

**A)** Determine final location for coat rack.

Using a level, position **coat rack assembly** and mark 2 hole positions on the wall.

**B)** Drill a pilot hole in the wall stud. If the wall stud is not available, drill a hole in the wall that is slightly smaller in diameter than the anchor. Insert 2 **plastic anchors** into holes. Gently tap **plastic anchors** into the wall until the flange of the anchor is flush.

**C)** Insert 2 **screws** into **plastic anchors** in the wall as shown, using a screwdriver.

**D)** Attach **coat rack assembly** to corresponding screws in the wall. Make sure coat rack is securely supported by screws. Installation is now complete.

**NOTE:** If you are unsure about your wall type or what mounting method you should use, consult a qualified professional or your local hardware store.

## cleaning and care

Clean surfaces with a dry or damp soft cloth. Do not use abrasive cleaners.
