tools required

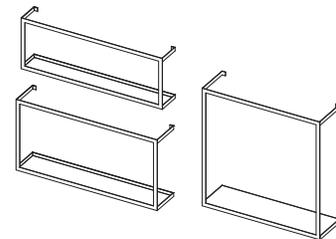

Phillips head screwdriver

power drill
 (for pilot holes only)

components

3 - wall shelves

wall mounting assembly

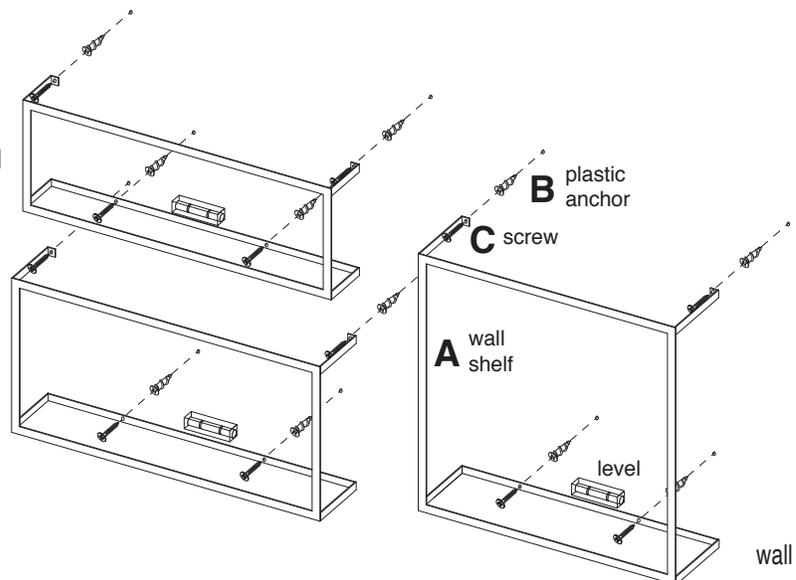

For safe mounting, it is essential to use wall anchors appropriate to your wall type (i.e. plaster, drywall, concrete, etc.). Mount to wood studs whenever possible. These instructions are for drywall mounting only.

A) Determine the final configuration and location for wall shelves. Using a level, position **wall shelf** and mark 4 hole positions on the wall. Repeat step for remaining wall shelves.

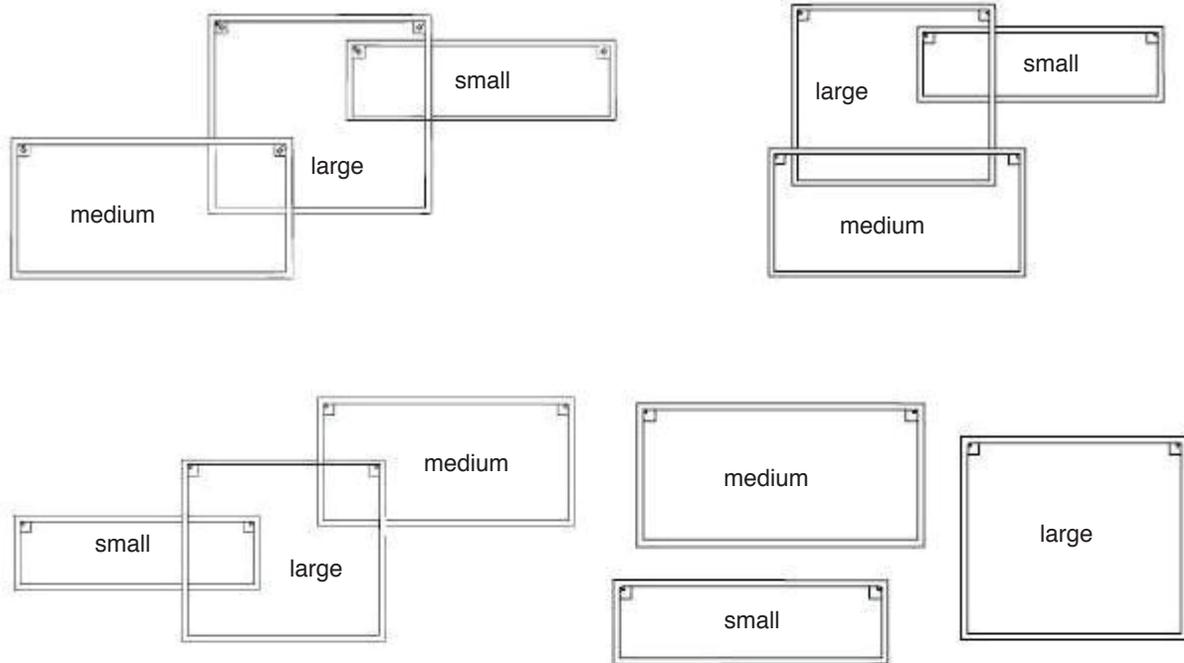

B) Drill a pilot hole in the wall stud. If the wall stud is not available, drill a hole in the wall that is slightly smaller in diameter than the anchor. Insert 12 **plastic anchors** into holes. Using a screwdriver, insert **plastic anchors into the wall** until the flange of the anchor is flush.

C) Insert 4 **screws** through each **wall shelf** and into **plastic anchors** in the wall as shown, using a screwdriver. Installation is now complete.

NOTE: If you are unsure about your wall type or what mounting method you should use, consult a qualified professional or your local hardware store.

mounting configurations

cleaning and care

Clean surfaces with a dry or damp soft cloth. Do not use abrasive cleaners.

Weight Limitations:

Small shelf is able to support up to a total of 26 lbs evenly distributed.

Medium shelf is able to support up to a total of 29 lbs evenly distributed.

Large shelf is able to support up to a total of 48 lbs evenly distributed.
