Please call  
**800.606.6387** for  
replacements.

## tools required

level

power drill  
(for pilot holes only)

Phillips head screwdriver

## components

1 - bookcase  
assembly

## wall mounting assembly

For safe mounting, it is essential to use wall anchors appropriate to your wall type (i.e. plaster, drywall, concrete, etc.). Mount to wood studs whenever possible. These instructions are for drywall mounting only.

**NOTE: If you are unsure about your wall type or what mounting method you should use, consult a qualified professional or your local hardware store.**

**A)** Determine the final location of unit. Using a level, position **bookcase assembly** onto wall until it is **level**. Mark 4 hole positions on the wall.

**B)** Drill a pilot hole in the wall stud. If the wall stud is not available, drill a hole in the wall that is slightly smaller in diameter than the anchor. Insert 4 **plastic anchors** into holes. Gently tap each anchor until the head is flush to the wall surface.

**C)** Insert 4 **screws** into anchors, leaving 1/4" of each screw head protruding from the wall.

**D)** Align keyholes of bookcase assembly with screw heads and fit into position. Make sure each screw securely engages each keyhole. Tighten screws. Installation is now complete.

## cleaning & care

Clean surfaces with a dry or damp soft cloth. Do not use abrasive cleaners.
