

# metal wall shelf

Thank you for purchasing the **Metal Wall Shelf**. This page lists all the contents included in the box. Please take the time to identify the hardware as well as the individual components to this product. As you unpack and prepare for assembly, place the contents on a carpeted or padded area to protect them from damage.

## hardware

4 - screws

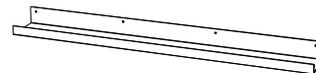

4 - plastic anchors

Missing hardware?

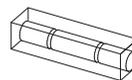

Please call **800.606.6387** for replacements.

## components

1 - metal shelf

## tools required

level

phillips head screwdriver

(We recommend the use of hand tools instead of power tools)

## wall mounting assembly

**NOTE: If you are unsure about your wall type or what mounting method you should use, consult a qualified professional or your local hardware store.**

For safe mounting, it is essential to use wall anchors appropriate to your wall type (i.e. plaster, drywall, concrete, etc.). Mount to wood studs whenever possible. These instructions are for drywall mounting only.

### cleaning & care

Clean surfaces with a dry or damp soft cloth. Do not use abrasive cleaners.

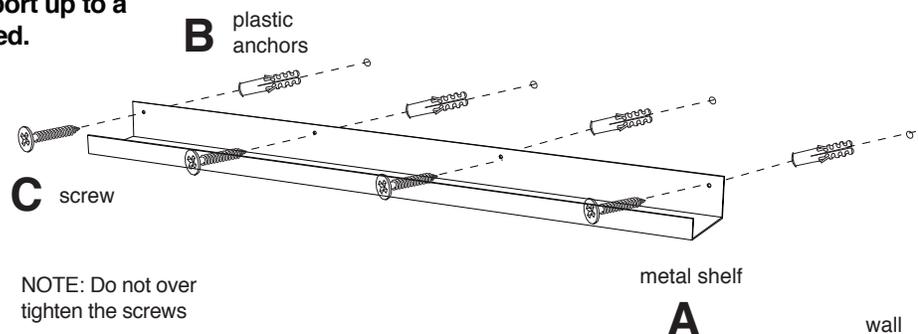

**Note: This item is able to support up to a total of 50 lbs evenly distributed.**

**A)** Determine the final location of unit. Using a level, position **metal shelf** onto wall until it is **level**. Mark 4 hole positions on the wall.

**B)** Drill a pilot hole in the wall stud. If the wall stud is not available, drill a hole in the wall that is slightly smaller in diameter than the anchor. Insert **4 plastic anchors** into holes. Gently tap **plastic anchors** until the flange of the anchor is flush with the wall.

**C)** Insert **4 screws** through **metal shelf** and into **plastic anchors** in the wall as shown, using a screwdriver.

Installation is now complete.

NOTE: Do not over tighten the screws
