replacements.

components

1 - bookshelf
assembly

tools required

phillips head screwdriver

power drill
(for pilot holes only)

level

For safe mounting, it is essential to use wall anchors appropriate to your wall type (i.e. plaster, drywall, concrete, etc.). Mount to wood studs whenever possible.

wall mounting assembly

NOTE: If you are unsure about your wall type or what mounting method you should use, consult a qualified professional or your local hardware store.

- A. Determine final location of **bookshelf**. If possible, make sure at least 1 hole is aligned with a wall stud. Using a level, adjust bookshelf until it is level. Mark holes on wall.
- B. If a wall stud is not available, drill a hole in the wall that is slightly smaller in diameter than the anchor. Insert 4 **plastic anchors** into the holes. With a **phillips head screwdriver**, tighten each anchor until the head is flush to the wall surface.
- C. Insert 4 **screws** into anchors, leaving 1/4" of each screw head protruding from the wall.
- D. Align **keyholes** of assembly with screw heads and fit into position. Make sure each screw securely engages each keyhole. Wall mounting is now complete.

cleaning & care

Clean surfaces with a dry or damp soft cloth. Do not use abrasive cleaners.
Note: This item is able to support up to a total of 130 lbs evenly distributed.
