

This page lists the contents included in the box. Please take time to identify the hardware as well as the individual components of the product. As you unpack and prepare for assembly, place the contents on a carpeted or padded area to protect them from damage. Please follow the assembly instructions closely. Improper assembly can result in personal or property damage.

### hardware & components

800.606.6387

4 - studs

4 - wall anchors

5 - 5 watt max CFL bulbs (INCLUDED)

4 - caps

OR

5 - 25 watt max type G candelabra bulbs (NOT INCLUDED)

1 - wall template

### tools required

Phillips head screwdriver

### IMPORTANT SAFETY INSTRUCTIONS:

For safe mounting, it is essential to use wall anchors appropriate to your wall type (i.e. plaster, drywall, concrete, etc.). Mount to wood studs whenever possible. These instructions are for drywall mounting only. **If you are unsure about your wall type or what mounting method you should use, consult a qualified professional or your local hardware store.**

This portable lamp has a polarized plug (one blade is wider than the other) as a safety feature to reduce the risk of electric shock. This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Never use with an extension cord unless plug can be fully inserted. Do not attempt to override this safety feature.

### cleaning & care

Dust surfaces with a dry soft cloth. Do not use polishes or cleaners on the lamp.

1

Determine the location for the wall sconce. Position **wall template** and mark 4 hole positions on the wall. Drill a pilot hole in the wall stud. If the wall stud is not available, drill a hole in the wall that is slightly smaller in diameter than the anchor. Insert 4 **wall anchors** into holes. Gently tap **wall anchors** until the flange of each anchor is flush with to the wall.

2

Insert 1 **stud** into each **wall anchor** as shown. Using a **Phillips head screwdriver**, fasten each stud into the wall, leaving threaded portion exposed as shown.

3

With assistance, fit studs through corresponding holes in lamp fixture. Fit 4 **caps** onto studs and turn each cap clockwise to secure.

4

Insert 1 **bulb** into each socket. **DO NOT EXCEED SPECIFIED WATTAGE.** Installation is now complete.
