tools required

phillips head screwdriver

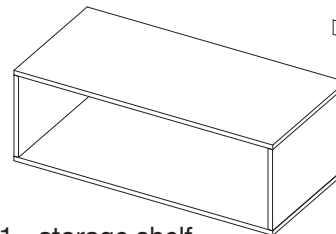

power drill
(for pilot holes only)

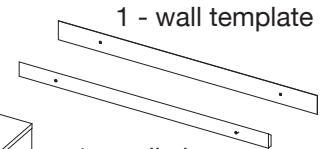

level

components

1 - storage shelf

1 - wall template

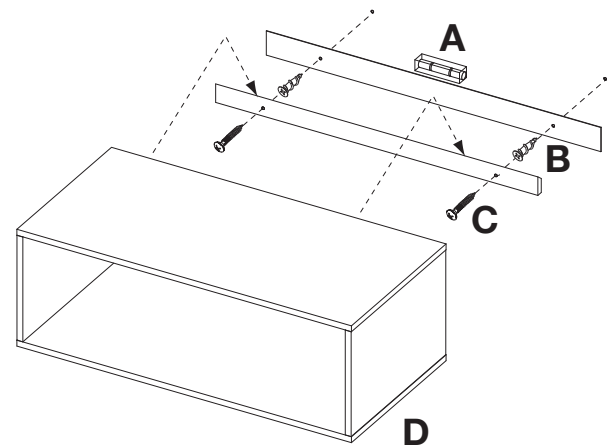

1 - wall cleat

wall mounting assembly

NOTE: If you are unsure about your wall type or what mounting method you should use, consult a qualified professional or your local hardware store.

- A. Determine final location of **storage shelf**. Place **wall template** on desired wall as shown. If possible, make sure at least 1 hole is aligned with a wall stud. Using a **level**, adjust **wall template** until it is level. Mark 2 holes on wall.
- B. If a wall stud is not available, drill a hole in the wall that is slightly smaller in diameter than the anchor. Insert 2 **plastic anchors** into the holes. Gently tap each anchor until the head is flush to the wall surface.
- C. Align holes of **wall cleat** with wall anchors, and attach with 2 **large screws** into the anchors. Secure, but do not over tighten screw, using a **phillips head screwdriver**.
- D. Fit cleat of **storage shelf** onto **wall cleat**. Make sure storage shelf is securely supported by wall cleat.

Wall mounting is now complete.

wall

For safe mounting, it is essential to use wall anchors appropriate to your wall type (i.e. plaster, drywall, concrete, etc.). Mount to wood studs whenever possible.

cleaning & care

Clean surfaces with a dry or damp soft cloth. Do not use abrasive cleaners.
Note: This item is able to support up to a total of 53 lbs evenly distributed.
