

Thank you for purchasing the **UP 21 Tower**. This page lists all the contents included in the box. Please take the time to identify the hardware as well as the individual components to this product. As you unpack and prepare for assembly, place the contents on a carpeted or padded area to protect them from damage.
 Note: 2 people are required to safely install this product.

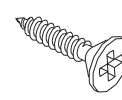

mounting hardware

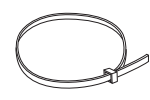

1 - wall bracket

1 - plastic anchor

1 - screws

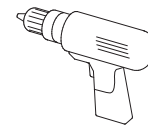

1 - wall strap

Missing hardware? Please call **800.606.6387** for replacements.

tools required

philips head screwdriver

power drill

cleaning & care

Clean surfaces with a dry or damp soft cloth.
 Do not use abrasive cleaners.

optional wall mounting assembly

NOTE:

If you are unsure about your wall type or what mounting method you should use, consult a qualified professional or your local hardware store.

For added safety and stability, it is recommended that the wall mounting hardware be installed. For safe mounting, it is essential to use wall anchors appropriate to your wall type (i.e. plaster, drywall, concrete, etc.). Mount to wood studs whenever possible.

- A) Determine the final location of unit. Mark position on the wall.
- B) Drill a hole in the wall stud. If the wall stud is not available, drill a hole in the wall that is slightly smaller in diameter than the anchor. Gently tap the **plastic anchor** until the flange of the anchor is flush with the wall.
- C) Attach the **wall bracket** to the wall by inserting 1 **screw** through the wall bracket and into the wall anchor.
- D) Lace one end of the **wall strap** through wall bracket and top of tower assembly into the other end of strap.
- E) Pull the strap tightly until secure.

Wall mounting assembly is now complete.
